

TREE PLANTATION IN GLOBAL INSTITUTES

The Eco Club of Global Institutes, Amritsar in collaboration with Rotary Club organized a Tree Plantation drive in its campus on 21st August 2015. The Chairman Dr. B. S. Chandi planted a tree in the Global premises and stated that trees are very useful for the human survival and we have no roots without trees. Adding further he said, “Trees were, and are, being cut down extensively to meet the needs of the growing population. Moreover, higher demand for land for agriculture and other purposes are met through deforestation. It is just like waging a war against ourselves. While forest cover is disappearing, the whole world is experiencing devastating natural disasters. We all know these are the consequences of our thoughtless planning. Some of these disasters are landslides, Glacial Lake Outburst, Floods etc. It is the time that the world starts working towards preserving what we are left with in unison. We must now realize the fact that without adequate green cover, no living beings can exist”.
