Expert Lecture on “Technology Enabled Business Transformation”

Mr. Mukul Sharma, Head, Business Transformation, Tata Consultancy Services, USA shared his vast experience and views on “Technology Enabled Business Transformation”. Known for driving results in matrix organizations with direct and indirect resources using effective communication, negotiation, conflict resolution, team building, problem solving and analytical skills, Mr. Mukul Sharma observed that success in any profession depends on having strong fundamental skills. Teachers must help their students to acquire them. Referring to the new face of business in the world, he opined that the latest applications of technology have brought a total change in all aspects of business operations. Modern business has become more business like and professional thanks to the advances in technology.
