

SEMINAR ON SMART GRID & IOT

Tech Craft Corps Club of Department of Computer Applications organized one Day Seminar on topic “**Smart Grid & Iot**” on 26th September 2016. Dr. Anil Verma from Thapar University Patiala delivered a lecture on this occasion. He explained in details the concept of Smart Grid and its advantages. Further, the use of SCADA software system in preparing smart grids was also discussed.

Additionally, in his discussion on the topic “Internet of things” the concept of communication between various objects (things) and architecture of IOT was highlighted. Moreover, various tools available in market based on IOT technologies were also explained. The students were shown the videos about the futuristic applications of IOT. Seminar was a great success and well appreciated by the students and faculty members.
