Global Institutes organizes 4\textsuperscript{th} State Level Science Fest

**SRISHTI-2014**

Global Institutes organized the 4\textsuperscript{th} State Level Science Fest - SRISHTI-2014 on 18th November, 2014 to encourage the technical, managerial & scientific temper of brilliant young minds. This festival provided all the participants a platform to showcase not only their talents and innovativeness but also an occasion to sharpen their soft skills and skills of team work. The Mega Science Fest brought nearly 5000 zealous students with sparks to change the world from more than 112 schools together in a highly professional and competitive environment. The Festival offered a wide range of engaging activities like Model/ Science Project Presentation, Recycling, Science Quiz, Collage Making, Extempore, Giddha, Bhangra, Skit, Face Painting and many more. The various events tested the participant’s ability of racing against time, team spirit and practical knowledge about basic science principles. The achievements of skilled and talented students were appreciated and recognized by honouring them with prizes and awards. The overall trophy was bagged by Ram Ashram Public School, Mall Road, Amritsar and the runner up trophy was bagged by Saint Francis Convent School, Amritsar.

Earlier, Hon'ble Chairman of Global Institutes, Dr. B. S. Chandi inaugurated the Science Fest by lighting the Lamp, symbol of knowledge. The Vice Chairman Dr. Akashdeep Singh congratulating the winners said, "Science is for everyone. It is the symbol of progressive civilization. We want to ignite a passion for discovery among young people and teachers across India.” He further said that participating in such festivals will help the students unlock their potential to pursue career in science. Welcoming the visiting Principals, teachers and students from different schools, Global Institutes Director, Dr. Arvind Bhardwaj, emphasized the constructive role of science in everyday life. It could easily be seen from the fact that if it were not for the inventions and discoveries of
science, mankind would have still been living in jungles, surviving on minimal comforts of life. The credit of all the progress that we see in the society goes to the patient hard work of scientists who work diligently in their labs so that people can live in peace and comfort.
