Two-day National Conference on “Inter-Disciplinary Research in Engineering Technology & Management” was organized at Global Institutes, Amritsar on 17 & 18 December 2014. The Conference brought together reputed researchers, professionals and academicians having expertise in their respective fields. More than 100 scholars from different Universities and Colleges across India presented their research papers in this conference. On the first day of the Conference there were three stimulating expert talks by Mr. Ranjan Vasisht, Ex DGM, Maruti Suzuki India Ltd., Dr. S.P. Singh, Dean Academic & Dean R & C, NIT Jalandhar, and Dr. Ajay Gupta, Associate Professor, NIT Jalandhar. Their scholarly discourses generated serious deliberations amongst the elite audience that had assembled from all over India in the State-of-the-Art Global Auditorium. In his very informative and well-illustrated scholarly discourse, Dr. S.P. Singh dwelled on the basic concepts for building safe non-engineered structures in Earthquake prone zones. He focused on various effects of Earthquake on different types of buildings from the traditional to the most modern high-rise buildings in metropolitan cities. In his concluding part, he described in detail the various design parameters which must be met for making masonry structures earthquake resistant. Dr. Ajay Gupta delivered a talk on the “Theory of Constraint”. He discussed the broad areas related to theory of constraint, the problems in the system due to the wrong measurement system, the different types of constraints and the methods of improving the system to enhance the production. Dr. Ranjan Vasisht talked about Operations Management in manufacturing as well as service industry. Briefly outlining the history of Operations Management since Greek times to industrial revolution, he observed that the concepts of mass production and six sigma have shown that there is always scope for improvements in whatever we are doing. On the second day of the Conference there were four technical sessions which were chaired by Professor D.S. Bhambra, Dr. Leena Jain and Professor Mr. M. Daniel Raj Kumar and Professor A. Anbu both from SRM University, Chennai.
